

How Update Firmware Ue Megaboom App For Mac

If you need a translation, please contact support to obtain a translation.

Q: How do I update the software on my UE BOOM ?

Update using the app

Your UE speaker gets better all the time through regular updates. Updates are wirelessly downloaded through your UE speaker app. Tap on the update icon for your UE speaker, and tap on "More" to see if there are updates. We will take care of the rest.

Update without the app

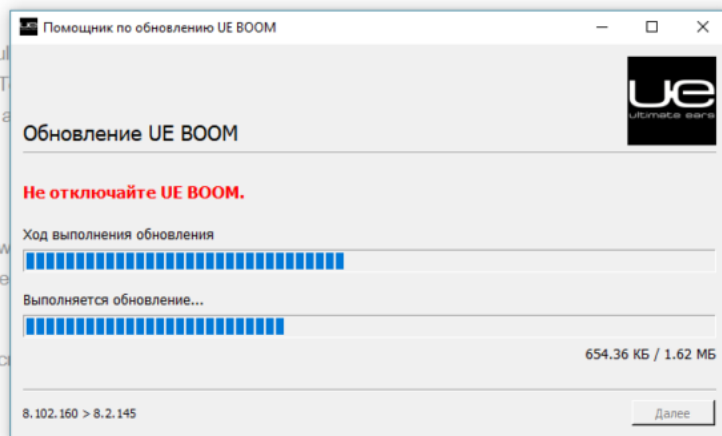

While it is quickest and easiest to update over-the-air with the app, we simply prefer to use an old-school desktop updater, we have a desktop utility below to download the update utility.

After you download the app, run it and follow the on-screen instructions on your computer to complete the update.

REQUIREMENTS: This update supports Windows 7 and above, Mac OS X (10.8.x) and above.

MAC OS X UPDATE

WINDOWS UPDATE
